GEORGE HADJISAVVA

SOFTWARE DEVELOPER

+35799931226   georgehadjisavvas12@gmail.com   https://georgehadjisavva.dev/   https://github.com/sCuz12

SKILLS

- Laravel
- PHP
- Algorithms
- Data Structure
- Golang
- React.js
- Amazon S3
- Typescript
- Tailwind
- Java
- Bootstrap
- Javascript
- MySQL
- Git
- Redis
- RabbitMQ
- Elasticsearch
- Docker
- Postman

WORK EXPERIENCE

Freelancer
Fullstack Developer • 2023 - Present

Laravel API Backend:
- *Designed and maintained RESTful APIs for various applications.*
- *Integrated third-party services and managed database interactions.*
- *Ensured security and compliance standards in API development.*

React & React Native
- *Developed dynamic and responsive user interfaces using React for web and React Native for mobile applications*
- *Integrated state management and optimized performance across platforms for a seamless user experience.*

Golang
- *Developed high-performance services , optimizing for speed and efficiency.*
- *Implemented concurrent processes to handle large-scale data processing.*

Aylo (Formerly MindGeek)
Software Developer • 2020 - 2023

- *Developed new back-end features for a high-traffic platform, enabling a significant increase in the system's capacity to handle 30k requests per second.*
- *Implemented Microservices using Laravel framework to support the seamless integration of new product features.*
- *Utilized SOLID principles and design patterns, such as Factory, Repository, and Singleton, to write clean, maintainable, and efficient code.*
- *Improved system performance by optimizing code execution, reducing response times, and enhancing the overall user experience, resulting in a significant increase in total revenue.*
- *Actively participated in daily code reviews, ensuring the delivery of high-quality code and promoting collaboration within the development team.*
- *Conducted regular monitoring and analysis of Kibana/Sentry logs, resulting in a 30% reduction in errors and warning logs within a Quarterly timeframe*
- *Implemented various optimization techniques, such as query caching, query rewriting, and index optimization, resulting in a substantial reduction of 109ms in full-text searching response time.*

Cablenet Telecommunications
Software Developer • April 2019–Jul 2020

- *Played a crucial role in the complete software lifecycle of a web application, starting from gathering requirements to ensuring a successful deployment.*
- *Played an instrumental role in the development of multiple mission-critical business processes using BPM software, specifically Bizagi.*
- *Played an integral part in the development of an automation provisioning system for fiber optics, utilizing technologies such as Spring Boot and Symfony.*
- *Participated in the migration process of Oracle's billing system, collaborating with third-party companies (Intrasoft and Oracle) to ensure a seamless transition*

Fileminders - Iron Mountain LTD
Part Time - Database Administrator • March 2016

- *Migrating and analyzing data from customers' current software to Fileminders' cutting-edge software solution, M-files.*
- *Performing multiple daily queries on the Microsoft SQL Server and exporting data to various formats, ensuring efficient data retrieval and processing.*
- *Conducting data preprocessing tasks using multiple Excel formulas to manipulate and transform the data effectively.*

*References can be provided upon request

B.Sc Computer Science - Information Systems

- Recognized with Dean's Achievement for outstanding performance in the B.Sc in Computer Science - Information Systems program
